SUMMARY

Full-stack developer and Computer Science undergraduate who designs, builds, and ships production web and mobile apps end to end — React, Next.js, and TypeScript on the front end; Node.js, Convex, and REST/third-party APIs on the backend. Experienced building automation pipelines and integrating LLMs and agentic AI into products, and works fluently alongside AI agents and agentic coding tools to go from spec to shipped feature fast.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, HTML, CSS, MATLAB

Frontend: React, Next.js, React Native, Expo, Tailwind CSS

Backend & Data: Node.js, Convex, REST APIs, third-party & webhook integrations, authentication

AI & Automation: LLM integration, agentic AI, prompt engineering, workflow automation, MCP servers, AI media pipelines

Agentic Coding: Claude Code, AI-assisted development, spec-to-ship workflows

Tools & Platforms: Git, GitHub, Vercel, Figma, Notion, Slack

PROFESSIONAL EXPERIENCE

Viralinn

2025 – Present

Founder & Full-Stack Developer

- Designed and built Viralinn, an AI-powered UGC platform, full-stack in React, Next.js, TypeScript, and Convex — from the marketing site through the authenticated product.
- Integrated multiple third-party AI APIs (image, image-to-video, voice, and music generation) into an orchestrated content-production pipeline, and built an MCP server exposing generation tools to AI agents.
- Engineered automation and agentic workflows that turn a brief into finished ad creative, shipped and deployed on Vercel, cutting production time and cost versus a traditional video shoot.

GaaSstudios

2024 – Present

Owner & Lead Developer

- Built and shipped client websites and landing pages in React and Next.js, along with the backend automation behind them.
- Designed and deployed automated cold-outbound email infrastructure integrating multiple third-party APIs to book qualified sales calls for SaaS and D2C clients across fitness, e-commerce, and creator-economy brands.

Proven Sport

2026

Web Developer (Contract)

- Led a full website rebuild for a sports-performance brand, shipping a new homepage, dynamic contact form, and athlete roster, and rebuilt the site's information architecture to clarify the offer and next step.

Found[ERS]

2025 – Present

Founder & Executive Director

- Founded a national student entrepreneurship organization, built its website (foundersersers.com), grew it to 35+ active student founders, and produced the Founder & Pitch Summit (May 2026).

CapitalCollab

Dec 2025 – Present

Business Development Associate, Private Credit

- Contributed to development of an internal web application to migrate the company off 15 years of Salesforce onto a modern, up-to-date system, and built supporting front-end sites and automations.
- Advise small-business owners on financing options (working capital, lines of credit, SBA loans, equipment financing) and coordinate with underwriting to reach term sheets.

PROJECTS

Studios — Founder & Developer

- Architected a churn-prevention SaaS tool that flags at-risk customers before they cancel. Built on Next.js and Convex with a custom event-tracking system and risk-scoring logic.

TruceAI — Founder & Developer

- Designed and specified an AI mobile app that reframes emotionally charged messages between partners to de-escalate conflict. Produced the brand, product spec, and a public waitlist.

EDUCATION

University of Connecticut · Storrs, CT

Expected May 2029

Bachelor of Science in Computer Science

- Transferred from New York Institute of Technology (2024–2026).

- Relevant coursework: Object-Oriented Programming (Java), Calculus, Physics, MATLAB, Research Writing, Engineering Ethics.
